

Chez Xavier

The project is situated on a site with significant topography, prompting the development of a series of built volumes integrated into the slope. These volumes open onto existing terraces, with terrace walls reinforced and built in stone.

The roof is designed to be visually appealing from the surroundings. Terra cotta is chosen for its material quality, with edge details eliminated on the upper parts of the walls, allowing the roof to blend seamlessly as it nears the ground.

LIEU Clermont l'Hérault, 34800 [Hérault]

CLIENT Private

SURFACE 312m²

PROGRAM Single-family house

COST 785 195€ excl. taxes

PHASE Delivered in 200
